

At IDEAL Brake Parts, safety is always our #1 priority.

It's how we build our brake pads. With the most precious cargo at stake, only the safest brake pads on the market are acceptable for your fleet. IDEAL Medium Duty Fleet brake pads offer the utmost in reliability and safety under all driving conditions.

Developed, engineered, formulated and manufactured in Canada, put your trust in IDEAL.

✓ **Canadian Made = ACCOUNTABILITY**
Each and every IDEAL brake pad is molded using enhanced technology at our Guelph, Ontario, Canada state-of-the-art manufacturing facility to ensure premium, reliable products.

✓ **Premium Medium Duty Formulations = DURABILITY**
IDEAL Medium Duty formulations are designed to ensure outstanding, reliable performance that school bus fleets require. All parts are post cured for consistent performance out of the box – no break in period required.

✓ **Mechanical Retention System = SECURITY**
IDEAL brake pads feature backing plates from OE backing plate manufacturers that mechanically attach the friction material to the steel backing plate, offering exceptional attachment and shear strength demanded by Fleets and Medium Duty applications.

✓ **100% Asbestos Free = RESPONSIBILITY**
All IDEAL brake pads are, and have always been, 100% Asbestos FREE.

✓ **In-House R&D Lab & Testing Facility = COMMITMENT**
At IDEAL Brake Parts, our in-house dynamometer testing of formulations as well as repeatability testing of each batch ensures outstanding consistency and quality. We conduct the vigorous testing under our roof, by our team.

✓ **Premium Components & Design = COMPREHENSIVE**
IDEAL brake pads feature OE style slots & chamfers, Premium OE Style TruQuiet Rubberized Shims and Premium Abutment Hardware Kits, where applicable. We supply you exactly what you need for the best brake job for your fleet.

✓ **More uptime, less downtime = PROFITABILITY**
Installing IDEAL Medium Duty pads ensures that your fleet will spend more time on the road than in the shop. Reliable, long lasting safe braking.

What's stopping you from buying the best for your fleet?
